**SUPPORTED IP VIDEO  
SURVEILLANCE DEVICES**

Following is the current list of IP Cameras, Video Encoders, NVRs and DVRs supported by the eKeypad family of applications.

This list is updated very frequently. If you do not see the device you would prefer to use please contact support ([support@ekeypad.net](mailto:support@ekeypad.net)). We can provide updated information on supported devices. For devices we have not tested we will be happy to analyze and add them if possible.

In addition to the pre-configured library eKeypad also supports custom IP Video device setup. In many cases support can help you setup an unlisted device using these custom settings. Contact us and we will be happy to help.

## IP Cameras

ACTi ACD 2100	Arecont IP Camera (V)
ACTi ACM 1271	Asoni IP Camera (V)

### **Special Notes for IP Video Support:**

- 1) All Dedicated Micros DVRs viewable in NetView Observer are compatible with eKeypad. Certain generation 1 devices do not have an interface usable by either NetView Observer or eKeypad. If support is in doubt, please contact us for help.
- 2) All cameras marked as Verified (**V**) have been directly verified by as working. Unmarked entries use the interface specification provided by the manufacturer, but have not been directly or independently verified. In most cases these entries will work, but it is possible that human error may require custom configuration.
- 3) In addition to the pre-configured library eKeypad also supports custom IP Video device setup. In many cases support can help you setup an unlisted device using these custom settings. Contact us and we will be happy to help.
- 4) This document is current as of May 3, 2016. Please contact support for an update versions of this document or information on supported devices.

# eKeypad Mobile Solutions

<http://www.ekeypad.net/>

Email: [support@ekeypad.net](mailto:support@ekeypad.net)

@eKeypad

Now an integrated GUI for your integrated system.

eKeypad Mobile Solutions creates solutions that manage home security and automation integrations.

With focus on the needs of both end-user needs and installers, eKeypad is able to deliver easy of use in a package that can be supported with minimal effort.

Release the full potential of your integration today!
