

Elk M1 Status at a Glance

Apple Watch Extension for eKeypad Pro

Any time, anywhere access to your Elk M1 is now easier with the Apple Watch extension. We simplified the design for quick and discrete use. And best of all, this is a free add-on.

eKeypad Pro is used to select items and define the order they will appear. When the Apple Watch is in use, the eKeypad icon will appear on the iPhone lock screen. This icon allows you to launch the phone application and continue where you left off on the Watch.
