

Increase the Value of ELK M1 Installs

- Designed from an installer's perspective
- Co-branding and resell license options
- Easy to use with touch screen controls
- Combine complex systems into one app
- Supports iPhone, iPad and Apple Watch

Success by Design.

eKeypad was designed with the help of existing installers for use by installers.

Let eKeypad work for you. It can help you sell more installations and increase your margins.

Best app on my iPhone ★★★★★

"The eKeypad app is the most useful app on my iPhone. The app is rock-solid with great support. I can't imagine having an ELK M1 panel without having this app."

- iTunes Review

Customization.

Easily create custom interfaces for each customer.

We can do the work for you or give you on-line training. All of the features you need are built into eKeypad. The options are only limited by your imagination.

Integration.

Make complex systems look simple.

A single application, makes the control of complex systems easier and faster.

We support a large list of security, home automation, audio and IP video devices. New devices are being added regularly. There is no limit to the number of devices eKeypad can support for any given customer's location. Advanced features allow you to group complex systems into a simple, customizable, easy to use interface.

You choose the equipment and together we can hide the complexity for end-users.

Best software yet ★★★★★

"eKeypad is the number one stop for your alarm solution needs. The home automation management system is superb. The response to this app is phenomenal. I would recommend this app to anyone!"
- iTunes Review

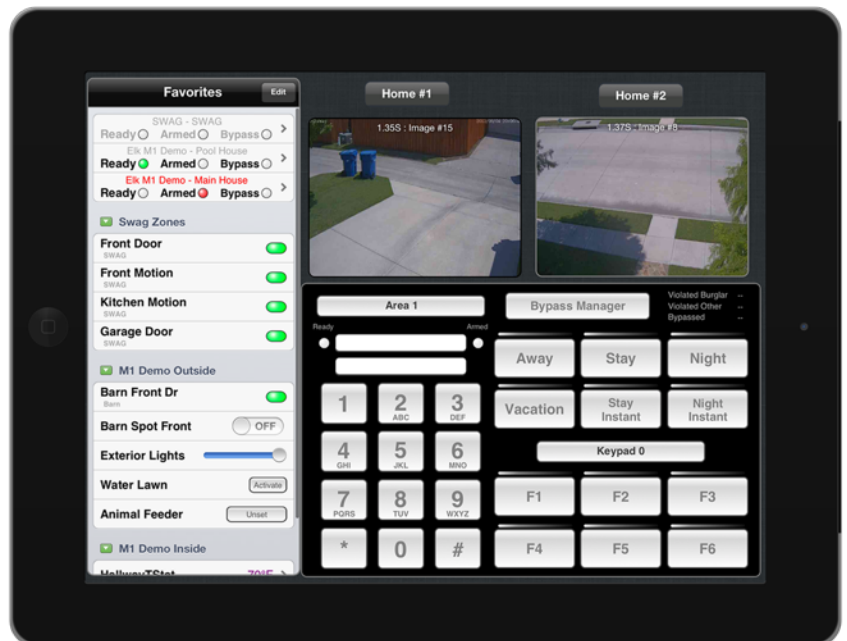

Support.

You are never alone with eKeypad.

Your success is our success. Our goal is to make sure you have a quick and trouble free install.

To insure that we provide phone and email support to give you the help you need:

- Pre-sales questions
- Job quote assistance
- Installation technical support
- Professional services
