

Make the Most of your ELK M1

No recurring fees
Mobile device control
Custom touch screens
Easy to use and reliable
iPhone, iPad and Apple Watch

Now you can make the ELK M1 System easier to use by adding secure, reliable and convenient control. Make the system available anywhere you go and customize it to meet your needs.

Ask your installer to include eKeypad with your system today.

Best app on my iPhone ★★★★★

"The eKeypad app is the most useful app on my iPhone. The app is rock-solid with great support. I can't imagine having an ELK M1 panel without having this app."

- iTunes Review

Private and Secure

Security and privacy are always important to us. Information in eKeypad is stored securely and never exposed to the internet. Multiple layers let you control who and what features are accessed on your system. Your installer can show you these features and even enable advanced protection options.

Personalized For You

The built-in interfaces allow you full control of all M1 System functionality. By using advanced options, eKeypad can be customized to look and behave in a way that will meet your needs.

Just a few of the many options available:

- Gain quick access to common items
- Simplify control of complex systems
- Create powerful, interactive floor plans
- Password protect the control of items
- Hide or show items by individual user
- Manage multiple systems and locations
- Seamlessly integrate video surveillance

Make your ELK M1 System uniquely yours. With the help of eKeypad and your installer the only limit is your imagination.

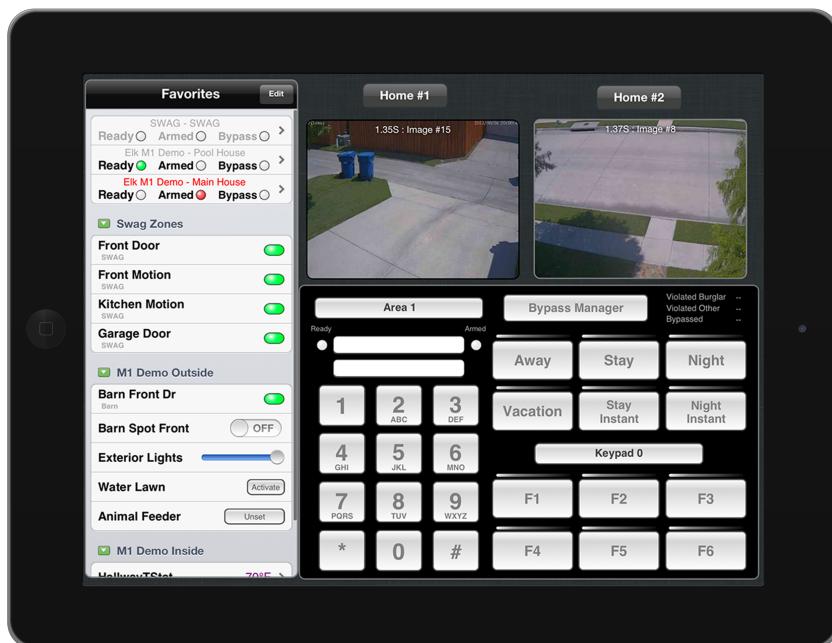

Best software yet ★★★★★

"eKeypad is the number one stop for your alarm solution needs. The home automation management system is superb. The response to this app is phenomenal. I would recommend this app to anyone!"

- iTunes Review

Support

With eKeypad Mobile Solutions you are never alone. We are always here to support you and work closely with your installer to make eKeypad the reliable and dependable interface you need.
